 Riverine LIFE Platform Meeting, 10 – 12th September 2014, Tartu, Estonia

LIFE Application 2005

Project focus:

- Actions in 4 river systems
- Removal of obstacles and creation of free passage and access to suitable spawning grounds.
- Establishment of new nursery areas and securing access to already existing but non-functioning potential nursery areas.
- General river restoration and improvement of physical conditions, re-meandering of straightened river stretches and a halt for river maintenance e.g. weed cutting.

Budget:

- € 13.385.913 (LIFE contribution € 8.031.548 or 60%)

Duration:

- October 2005 – December 2012

Projektets hovedelementer:

- Etablering af ca. 1.300 m nyt vandløb med afvikling af fald på 2.5 m ~ 2-4 00/o fald
- Udlægning af ca. 3.750m³ sten og gydegrus
- Ny bro under Slotsvej
- Oprensning af ca. 3 ha sø ned til ca. 1.5 m dybde
- Afpropning af turbine
- Bevaring af lille omløb
- Fortsat vandgennemstrømning i søen

Economy:

- Houting project approx. € 2 mill. – 60% from LIFE
- National effort approx. € 3.5 mill.

Effekter

- No significant barriers for fish migration from 2014
- Self-reproducing, viable fish populations with no need for re-stocking
